December 2026 link proposals — at a glance

All 14 proposals against today's link — the two shortlisted ones marked ★ — sorted by December rules met, then avoidable fatigue warnings, then by name; a proposal that breaks a hard limit cannot be run as it stands and comes last. Every figure is worked out from the rota, by the Marylebone Roster app's own checks and the tooling beside them. Staffing levels and Sunday cover confirmed verbally (29 Sep 2026); the 26-line link, 5 cover weeks and a ceiling of 219 contracted days a year set on 1 Oct 2026.

Proposal · code	December rules met	Avoidable fatigue warnings§	Most days in a row§	Full weekends off	Shortest fixed-duty rest	Shift times	Days a year*	Heaviest week, Mon–Sat	Weeks on one turn	Weeks mixing earlies and lates	Week-to-week change of start	Finishes 23:00+ a year†

* Monday to Saturday, with a cover week counted as 4 days (Sundays are overtime and left out). † Each person, on average across the whole link, Sundays included; cover-week duties are not known yet and are left out. "Shift times" counts different start–finish times; "new" means nobody works that time today. "Weeks on one turn" means one shift time Monday to Friday, all earlies or all lates; beneath it, the longest block of weeks in a row on one kind, "up to" if the cover weeks beside it go the same way. The week-to-week change is the average move of the start time from one week to the next. § On the duties the rota fixes, the cover weeks left out for the proposal and today alike; "up to" is the worst place a cover week's four duties could fall. Avoidable fatigue warnings come from the ORR's good-practice list plus rail-industry checks, leaving out the two that come with every weekly link — reported, never pass or fail. Full detail for each proposal is in its own eight-page sheet; the rules themselves are in links-26-rules.pdf.
