

# Proposed CEA Link — December 2026

A 24-line link supplied as a Word table and assessed here — weekday lates at 16:25, Saturdays left as they are, and every turn a time people already work

Prepared 24 September 2026 · built for the December 2026 timetable and assessed by the workspace's own rule modules (Marylebone Roster v24.21) · figures on this page are computed, not typed

## PROPOSAL

# Weekday Lates

Weekday lates at 16:25, Saturdays untouched

CODE **WL-24-EXT**

FINGERPRINT **a52ec588**

BUILT FROM duty table — · seed — · 24 lines · 4 cover weeks

LINEAGE Supplied as a Word table and assessed here — not produced by the proposal search. Compare with "Same Turns" (ST-24-B7 · d15e1b74) and "By the Book" (BB-24-D7 · 0f14abce), both of which were built by the search and judged by the same modules.

✓ **24** lines designed

✓ **35h 00m** a week — exactly the contract

✓ **0** hard-limit breaches

✓ **0** rests under 12h

⚠ **5** fatigue factors present — 4 as rostered (today: 5)

## 13 of 18

shift times are today's

5 times are new; the rest are turns people already work

## 9 days

longest run of worked days

today's link reaches 9; Chiltern's limit is 13

## 7 of 20

working weeks are one turn

same clock time all week, as 7 of today's 16 are

## 6 in 24

full weekends off

25% of the rotation, against 20% today (4 in 20)

## 4 cover weeks

lines 1, 7, 12, 17

gaps of 8, 6, 5, 5 around the wheel — today's sit at 1, 7, 12, 17

## 4h 43m a week

typical week-to-week move

how far the working day shifts each week — today's link moves 4h 0m a week

## What this is

A proposal for the CEA link once the December 2026 timetable arrives, for a team of 24 rather than 20. The brief was to keep the **feel** of the link people work today — a week is one turn, rest days come in pairs, four whole cover weeks spread round the rotation, and the same 06:20 / 08:00 / 14:00 / 15:15 clock times — while meeting the staffing shape agreed for December (four to open every day, three through to the close, four on a Saturday, five still on at 22:00, fourteen on a Saturday, ten on a Sunday) and every rule the link is assessed against: Chiltern's 13-day limit, twelve hours between duties, the exact 35-hour contracted week, and the ORR's good-practice fatigue factors.

It was not drawn by this app. It arrived as a Word table — a proposal from outside the workspace — and was read straight into the app's own shape, then judged by the same modules that judge a design the workspace generated itself: runDesignChecks, weeklyHours, assessHardLimits, assessFatigue, scoreOrder and calcHourlyCoverage. There is no search behind it and nothing to reproduce; what can be checked is every figure on these pages, each computed from the cells on page 6. Paste those cells into Links → Import and the workspace restates all of it.

**What it is not.** Not a recommendation and not a finished roster: nothing here has been through the roster office or a rep. The 24-line length, the four cover weeks and the December headcounts are owner-relayed figures with no document behind them (evidence class C), and the 13-day limit's policy citation is still outstanding — pages 5 and 6 say so where it applies. It clears every rule the tool can check, which is the floor for being worth discussing.

## THE ROTATION

## The 24-line link

Sunday to Saturday per line; everyone moves down one line each week and line 24 goes back to line 1. Hours and days at the right, cover beneath.

| LINE    | SUN            | MON            | TUE            | WED            | THU            | FRI            | SAT            | MON-SAT<br>hours | ALL WEEK<br>hours | DAYS WORKED<br>Mon-Sat | TURNS<br>in the week |

Busiest weekday · Saturday · Sunday. The first three columns are what the 20-line link does now; the last three are the proposal. Green cells grew, amber shrank, a struck-through row is a time the proposal does not use.

Why the duties land where they do: Monday to Saturday totals exactly 42,000 minutes, which is 20 × 35h to the minute, so the contract is paid. But unlike a table built day-uniform, **the weekdays here are not equal** — Mon 6,225 · Tue 7,205 · Wed 7,205 · Thu 7,780 · Fri 7,690, and Saturday 5,895. Monday is the lightest day by some margin and Thursday the heaviest; that is a property of the design rather than a fault, but it is the first thing to put to the roster office, because it decides how much cover each day really has.

# People on duty, hour by hour

Cover today and proposed against the measured December 2026 timetable (arrivals and departures, weighted by train length). A darker orange hour carries more of the day's traffic.

Spare cover is not in these figures — a cover week carries no times, so the rows are a floor. **Fit** is the squared gap between each hour's share of the day's traffic and its share of the cover, inside the day's window — lower is better, and today's link scores what it scores. It is measured on duty minutes, so an hour a duty only touches counts in proportion; the cells above count heads. It is the measure the searched tables were chosen on, and the fit of the average weekday is the *Wk fit* on page 7. Sunday: 5 December movements fall after the 23:25 finish — the standing question on whether Sunday's window moves; the window is stored per design, so this proposal can be rebuilt to either answer.

**Reading it.** The proposal raises the whole day rather than reshaping it, which is what the December brief asked for — the station rosters posts (ticket office, gateline, passenger assist) plus break cover, and a post needs someone on it whether the hour carries 23 trains or 5. The weekday's two peaks are a duty length apart, so cover stays fairly flat between them by arithmetic, not neglect.

# The checks sheet

Hard limits first — met or not. Then the ORR good-practice fatigue factors, which report what is present and never pass or fail a design.

**Hard limits** — a design either meets these or cannot be run

- ✓ **More than 13 consecutive days worked** — longest possible run **9** days (today: 9)  
Longest possible run is 9 days, within the 13 configured here from Chiltern practice (origin: the legacy Hidden standard). A spare week is 4 duties of 7 and the roster clerk places them, so this is the worst case the link allows. Worked as a BLOCK of four rather than split day-on-day-off, the answer is the same — **9** days — so this row does not depend on how a cover week is placed.  
Basis: Chiltern roster policy, citation outstanding — legacy Hidden 13-in-14 standard. Configured from Chiltern practice; the policy citation is outstanding, so this is stated as the app states it.
- ✓ **At least 12 hours between duties** — **0** rests under 12h anywhere in the rotation, Saturday-into-Sunday and line-into-line included (today: 0)  
Tightest anywhere: **13h 35m — line 20 Fri 16:25-23:55 into Sat 13:30-22:00** (today's tightest: 12h 30m). The generator refuses a design it cannot repair to this; the search here never produced one.
- ✓ **The contracted week, exactly** — **35h 00m** average Mon-Sat over the 24 lines, cover weeks counted as contracted weeks  
700h of duty a week across 20 working lines. Sundays (77.25h) sit on top as RDW, as they do today. Individual weeks range 24h 30m–45h 05m; only the average is the contract.

**December design figures** — the staffing shape agreed for the new timetable

| RULE                                           | PROPOSAL                                          |                                                                                         |
|------------------------------------------------|---------------------------------------------------|-----------------------------------------------------------------------------------------|
| Four on at the open, every day                 | × 4 weekday · 5 Saturday · 3 Sunday               |                                                                                         |
| Three through to the close; four on a Saturday | × 3–4 weekday · 3 Saturday · 3 Sunday             |                                                                                         |
| Five still on duty at 22:00                    | × 4–6 weekday · 3 Saturday                        | a 22:00 finish is not "on at 22:00"                                                     |
| Fourteen on a Saturday, ten on a Sunday        | × 12 · 9                                          |                                                                                         |
| Cover weeks, evenly spread                     | × 4 weeks at lines 1, 7, 12, 17 — gaps 8, 6, 5, 5 | the December shape asks for four, evenly spread — the count is right; the spread is not |
| About 4.2 days a week worked, Mon-Sat          | ✓ 4.35 over the 20 working lines                  |                                                                                         |
| No :05 or :10 times except the open and close  | ✓ none                                            |                                                                                         |
| Late turns slightly shorter than most earlies  | × not met — lates 7h30–9h10, earlies 7h15–8h30    | the longest late is longer than the longest early                                       |

## To settle before it is frozen

**Late-turn length.** The lates here run longer than the earlies, which is the reverse of the December preference — the 14:45–23:55 Saturday closer is 9h10 against a longest early of 8h30. **Cover weeks.** Four, at lines 1, 7, 12 and 17, where the December shape asks for five evenly spread. **Sunday's finish** — five December movements fall after 23:25; this design inherits today's window rather than deciding it.

# ORR fatigue factors

Good practice guidelines — Fatigue Factors, p3 (December 2021).  $\Delta$  present · ✓ clear · ● standing, a property of the operation · – not applicable. Nathan assesses against this list.

| CODE | FACTOR                                                                                | TODAY'S LINK                                | PROPOSED                                     |

Present: 5 in the worst case, **4** as rostered (today 5) · standing: 2 · FF2 fires on every 06:20 duty, so it is a property of the station's opening time rather than of any design. **Two readings of a cover week, on the one row they move.** A cover week is worked four days of seven and the link does not say which four, so a run figure is a range. The headline number is the ceiling — the four split day-on-day-off, which supplies no 48-hour break and joins the blocks either side. It is reachable: of the 35 ways to place four duties in seven days, the 10 that leave no two rest days together produce exactly it. Worked as a BLOCK, which is what a cover week looks like on the roster, the three rest days fall together and the week always supplies a break — that is the *as rostered* figure beneath it. Checked on every row: FF11 is the only one where the two differ. Which reading applies is a question for the roster office, not for this sheet. This sheet is an aid to a conversation, not a fatigue risk assessment.

## Where it came from

Checkable rather than reproducible: there is no search behind it, and every figure is computed from the cells

### Where this design came from

**1 • It was supplied, not searched.** This rotation arrived as a Word table and was read straight into the app's own shape — 24 lines, Sunday to Saturday, cover weeks as whole weeks. No table was enumerated for it, no grid was annealed and no seed produced it, so unlike *Same Turns* and *By the Book* there is no search to reproduce. What can be reproduced is every figure on these pages: they are computed from the cells opposite.

**2 • The judge is the same.** Scored by the workspace's own modules — `runDesignChecks`, `weeklyHours`, `assessHardLimits`,

`assessFatigue`, `scoreOrder`, `calcHourlyCoverage` — with no figure typed by hand and none softened. Where the design misses one of the December rules, the table opposite says so rather than omitting the row.

**3 • What that means for the room.** A supplied design is judged on the same evidence as a searched one, and it carries the same class-C caveats: the 24-line length, the cover-week count and the December headcounts are owner-relayed figures, and the 13-day limit's policy citation is still outstanding. This is not a recommendation.

### Alternatives measured

|-------------------------------------------------------------|----------|------------|----------|-------------|---------------|-------------|-------|
| <b>WL-24-EXT · a52ec588 — Weekday Lates (this proposal)</b> | <b>9</b> | <b>5</b>   | <b>6</b> | <b>7/20</b> | <b>4h 43m</b> | <b>38.3</b> | —     |
| Same Turns · d15e1b74 — the searched proposal               | 6        | 1          | 6        | 18/20       | 2h 33m        | 46.3        | —     |
| By the Book · 0f14abce — the searched proposal              | 6        | 0          | 6        | 12/20       | 2h 52m        | 30.8        | —     |
| Workspace default · 29ec9810 (Dec 2026 table, generated)    | 7        | 5          | 5        | 0/20        | 4h 16m        | 30.8        | —     |
| Today's 20-line link (for scale)                            | 9        | 5          | 4        | 7/16        | 4h 0m         | 44.7        | —     |

**How to read this table:** nothing here was picked by a search — this design was supplied or derived, and the rows are the comparisons it is being judged against. *Wk fit* is how evenly the WEEKDAY cover follows the December traffic curve (lower is better; today's link scores what it scores), so it says nothing about Saturday or Sunday. **Score** is the search's own feel objective and is blank here, because no search produced this design — a blank is not a bad score. The workspace default is the app's own December table, generated and reordered with every switch on.

LOAD IT

## The rotation, ready to paste

Line number, then Sunday to Saturday. SP is a cover week. Paste the whole block into Links → Import.

Links → Import, then paste the whole block below. Line number, then Sunday to Saturday; SP is a cover week. The workspace re-runs every check on these pages from the pasted cells, so nothing here has to be taken on trust — and the two designers can edit it there like any other design.

The same rotation is also supplied beside this PDF as Weekday-Lates-WL-24-EXT-import.txt (tab-separated, pastes directly) and Weekday-Lates-WL-24-EXT.json (the app's own format).

Prepared 24 September 2026. Every figure in this document was computed by the Marylebone Roster app's Links modules (v24.21) from exactly these cells; import them and the workspace's Design checks, hard limits, fatigue factors and coverage cards will restate them.
