Why Even Keel?

What every link in this pack gives, what this one adds, and what it costs

- ✓ Every link here: all 9 December rules and the 3 flexible ones; no fatigue warning
- ✓ Every link here: about 14 full weekends off a year (today 10), at most 5 apart
- ✓ Every link here: no shift over 9 hours, and every closing shift shorter
- ✓ This one adds: no week over 41h 30m, and the longest rest between shifts, 14h 35m
- ✓ 8 of 15 shift times worked today; 7 new, four of them today's lates starting later
- Costs: 44 late finishes a year (today 39), a mixed week, four weeks off 15 days not 14

Late finishes: 44 a year each (today 39) — two above the rules' minimum, buying a fourth person to the Saturday close. The colleague deck shows every cost openly.

What colleagues will notice

The good and the not so good — the colleague presentation shows both

Likely to welcome

- 14 full weekends off a year (today 10), at most 5 apart
- One shift time in 18 of 21 weeks (today 7 of 16)
- At most 5 days in a row on the fixed rota (today 7)
- No week over 41h 30m Monday to Saturday
- Shortest rest 14h 35m (today 12h 30m)

Likely to worry about

- Late finishes: 44 a year (today 39)
- 7 new shift times to learn, 2 on a Saturday
- Average shift about 2 minutes longer
- Best 14-day leave stretch 28 days, not 30
- Four weeks off takes 15 days' leave at best, not 14

Expect late finishes to be the first question — the colleague deck answers it openly.

Where it stands

Three things confirmed verbally, two decisions left, two points still open

Sunday cover — confirmed

To decide: which link we use

Colleagues' views come first.

Then: who starts on which line

Who begins on which week. Open: the 13-day limit's written source; the FF19 reading.
