

Proposed CEA Link — December 2026

A 24-line design supplied as a grid — cover weeks at 1, 7, 12 and 18, and the midday turn re-timed to 12:00–20:30

Prepared 17 September 2026 · built for the December 2026 timetable and assessed by the workspace's own rule modules · figures on this page are computed, not typed

PROPOSAL

Weeks 17-18 Swapped

Cover week at 18, midday turn at 12:00–20:30

CODE **WS-24-EXT**

FINGERPRINT **0bebb675**

BUILT FROM duty table — · seed — · 24 lines · 4 cover weeks

LINEAGE Supplied as a Word table and assessed here — not produced by the proposal search. Its duty table is its own: it matches none of the designs already in this folder. Compare with "Fifteen Turns" (FT-24-EXT · 9a028392) and "Weekday Lates" (WL-24-EXT · a52ec588), both also supplied, and with the searched proposals "Same Turns" and "By the Book".

✓ **24** lines designed

✓ **35h 00m** a week — exactly the contract

✓ **0** hard-limit breaches

✓ **0** rests under 12h

⚠ **5** fatigue factors present (today: 5)

13 of 19

shift times are today's

6 times are new; the rest are turns people already work

9 days

longest run of worked days

today's link reaches 9; Chiltern's limit is 13

6 of 20

working weeks are one turn

same clock time all week, as 7 of today's 16 are

6 in 24

full weekends off

25% of the rotation, against 20% today (4 in 20)

4 cover weeks

lines 1, 7, 12, 18

gaps of 7, 6, 5, 6 around the wheel — close to even, one line out

4h 17m a week

typical week-to-week move

how far the working day shifts each week — today's link moves 4h 0m a week

What this is

A proposal for the CEA link once the December 2026 timetable arrives, for a team of 24 rather than 20. The brief was to keep the **feel** of the link people work today — a week is one turn, rest days come in pairs, four whole cover weeks spread round the rotation, and the same 06:20 / 08:00 / 14:00 / 15:15 clock times — while meeting the staffing shape agreed for December (four to open every day, three through to the close, four on a Saturday, five still on at 22:00, fourteen on a Saturday, ten on a Sunday) and every rule the link is assessed against: Chiltern's 13-day limit, twelve hours between duties, the exact 35-hour contracted week, and the ORR's good-practice fatigue factors.

It was not drawn by this app. It arrived as a Word table — a proposal from outside the workspace — and was read straight into the app's own shape, then judged by the same modules that judge a design the workspace generated itself: runDesignChecks, weeklyHours, assessHardLimits, assessFatigue, scoreOrder and calcHourlyCoverage. There is no search behind it and nothing to reproduce; what can be checked is every figure on these pages, each computed from the cells on page 6. Paste those cells into Links → Import and the workspace restates all of it.

What it is not. Not a recommendation and not a finished roster: nothing here has been through the roster office or a rep. The 24-line length, the four cover weeks and the December headcounts are owner-relayed figures with no document behind them (evidence class C), and the 13-day limit's policy citation is still outstanding — pages 5 and 6 say so where it applies. It clears every rule the tool can check, which is the floor for being worth discussing.

THE ROTATION

The 24-line link

Sunday to Saturday per line; everyone moves down one line each week and line 24 goes back to line 1. Hours and days at the right, cover beneath.

Early turns Late turns Cover (spare) week — four duties of seven, any turn Rest day

Mon-Sat hours average 35h 00m over 24 lines, a cover week counted as a contracted week · days worked average over the 20 working lines

Same feel, more people

What this design keeps of today, and where the December headcounts differ

Kept — the shape of a week

MEASURE	TODAY (20)	PROPOSED (24)
Working weeks that are one turn (one clock time Mon–Fri)	7 of 16	6 of 20
Weeks mixing early and late turns	7	5
Rest-day breaks that are two days or more	13 of 17	15 of 22
Single rest days between duties (not a 48h break)	4	7
Days worked in a week (lines × days)	1×3, 3×4, 11×5, 1×6	1×3, 4×4, 13×5, 2×6
Cover (spare) weeks (whole weeks)	lines 1, 7, 12, 17	lines 1, 7, 12, 18
Distinct shift times (all already on today's roster)	18	19
Mon–Sat hours, average week (the contract)	35h 00m	35h 00m
Sunday duties (not contracted; half the working lines)	8 of 16 lines	9 of 20 lines

Changed — the December headcount

PEOPLE ON DUTY	TODAY	PROPOSED	WHY
Monday to Friday	12	15	the contract: 20 working lines × 35h has to be worked somewhere
Saturday	10	12	owner's figure for December, leaning late for events
Sunday	8	9	owner's figure for December
Opening at 06:20 (07:15 Sunday)	4	4	unchanged
Through to the 23:55 close, weekday	2	3	three to close
Through to the close, Saturday	2	4	four on a Saturday
Still on duty at 22:00	4	5	five are enough from 22:00

The duty table, in today's times

16:25–23:55 7h 30m · Late			4 +4	1 +1		

Busiest weekday · Saturday · Sunday. The first three columns are what the 20-line link does now; the last three are the proposal. Green cells grew, amber shrank, a struck-through row is a time the proposal does not use.

Why the duties land where they do: Monday to Saturday totals exactly 42,000 minutes, which is 20 × 35h to the minute, so the contract is paid. But unlike a table built day-uniform, **the weekdays here are not equal** — Mon 6,225 · Tue 7,205 · Wed 7,205 · Thu 7,780 · Fri 7,690, and Saturday 5,895. Monday is the lightest day by some margin and Thursday the heaviest; that is a property of the design rather than a fault, but it is the first thing to put to the roster office, because it decides how much cover each day really has.

People on duty, hour by hour

Cover today and proposed against the measured December 2026 timetable (arrivals and departures, weighted by train length). A darker orange hour carries more of the day's traffic.

Monday to Friday window 06:20–23:55

Spare cover is not in these figures — a cover week carries no times, so the rows are a floor. Sunday: 5 December movements fall after the 23:25 finish — the standing question on whether Sunday's window moves; the window is stored per design, so this proposal can be rebuilt to either answer.

Reading it. The proposal raises the whole day rather than reshaping it, which is what the December brief asked for — the station rosters posts (ticket office, gateline, passenger assist) plus break cover, and a post needs someone on it whether the hour carries 23 trains or 5. The one hour the search was allowed to favour is Saturday's 17:00–22:00, for events. The weekday's two peaks are a duty length apart, so cover stays fairly flat between them by arithmetic, not neglect.

The checks sheet

Hard limits first — met or not. Then the ORR good-practice fatigue factors, which report what is present and never pass or fail a design.

Hard limits — a design either meets these or cannot be run

- ✓ **More than 13 consecutive days worked** — longest possible run **9** days (today: 9)
Longest possible run is 9 days, within the 13 configured here from Chiltern practice (origin: the legacy Hidden standard). A spare week is 4 duties of 7 and the roster clerk places them, so this is the worst case the link allows.
Basis: Chiltern roster policy, citation outstanding — legacy Hidden 13-in-14 standard. Configured from Chiltern practice; the policy citation is outstanding, so this is stated as the app states it.
- ✓ **At least 12 hours between duties** — **0** rests under 12h anywhere in the rotation, Saturday-into-Sunday and line-into-line included (today: 0)
The generator refuses a design it cannot repair to this; the search here never produced one.
- ✓ **The contracted week, exactly** — **35h 00m** average Mon–Sat over the 24 lines, cover weeks counted as contracted weeks
700h of duty a week across 20 working lines. Sundays (77.25h) sit on top as RDW, as they do today. Individual weeks range 25h 30m–42h 30m; only the average is the contract.

December design figures — the staffing shape agreed for the new timetable

RULE	PROPOSAL	
Four on at the open, every day	× 4 weekday · 5 Saturday · 3 Sunday	
Three through to the close; four on a Saturday	× 3 weekday · 3 Saturday · 3 Sunday	
Five still on duty at 22:00	× 5 weekday · 3 Saturday	a 22:00 finish is not "on at 22:00"
Fourteen on a Saturday, ten on a Sunday	× 12 · 9	
Cover weeks, evenly spread	× 4 weeks at lines 1, 7, 12, 18 — gaps 7, 6, 5, 6	the December shape asks for five
About 4.2 days a week worked, Mon–Sat	✓ 4.35 over the 20 working lines	
No :05 or :10 times except the open and close	✓ none	
Late turns slightly shorter than most earlies	× not met — lates 7h30–9h10, earlies 7h15–8h30	the longest late is longer than the longest early

Two things to settle before it is frozen

Every hard gate is clear — 35h to the minute, no rest under 12 hours, no hard-limit breach, and the worst-case run of nine days is inside Chiltern's thirteen. What is left is advisory, and there is more of it than in the other proposals here. **Five ORR factors are present**, and two are the ones to look at: **FF11 at 16** shifts without a 48-hour break, against a threshold of 13 and the highest of any design assessed so far; and **MRSF at 60.6 hours** in a seven-day period against 55. **The longest run is nine days** — inside the limit, but above the design target of seven. **Only 6 of the 20 working lines are a single turn**, so most weeks ask somebody to hold more than one start time; that is what drives FF19 to seven. **None of this needs a duty to change**. Every one of those five is a property of which week sits next to which, not of the staffing — on the two designs already searched this way the same shape work took the factors from five to one and the run from nine to six with the coverage curve untouched. The cover spread is also one line out (7, 6, 5, 6), which the same search fixes for free.

#

Where it came from, and how to load it

Checkable rather than reproducible: there is no search behind it, and every figure is computed from the cells

Where this design came from

1 • It was supplied, not searched. This rotation arrived as a Word table with the cover week moved from 17 to 18 and the midday turn re-timed to 12:00–20:30. It was read straight into the app's own shape and judged; no table was enumerated for it and no grid annealed, so there is no search to reproduce. What can be reproduced is every figure on these pages.

2 • The reading was checksummed before anything was built on it. A grid read from a document can carry a silent transcription error, so the duty minutes were totalled against the contract first: Monday to Saturday comes to **42,000** minutes against 20 working lines × 35h = 42,000, exactly. A misread digit would almost certainly have shown up there.

3 • The judge is the workspace's own — runDesignChecks, weeklyHours, assessHardLimits, assessFatigue, scoreOrder and calcHourlyCoverage, with nothing typed by hand and nothing softened. Where the design misses one of the December rules the table opposite says so rather than omitting the row.

Paste it into the workspace

Links → Import, then paste the block on page 8. Line number, then Sunday to Saturday; SP is a cover week. The workspace re-runs every check on these pages from the pasted cells, so nothing here has to be taken on trust — and the two designers can edit it there like any other design.

The same rotation is also supplied as proposal-import.txt (tab-separated, pastes directly) and proposal.json (the app's own format).

How the winner was picked: rules first (rest, run, fatigue factors present, weekends off), then *Wk fit* — how evenly the weekday cover follows the December traffic curve (lower is better; today's link scores what it scores). Two candidates tied on every rule; the fit decided it, and the runner-up is named so it can be asked for. Score is the search's own feel objective (lower is better) and is not a verdict. The workspace default is the app's own December table, generated and reordered with every switch on — a good design by every panel, and not one that resembles today's.

LOAD IT

The rotation, ready to paste

Line number, then Sunday to Saturday. SP is a cover week. Paste the whole block into Links → Import.
